The SolarWise® for Schools renewable energy curriculum, published by Wisconsin Public Service, includes 30+ hands-on, ready-to-use lessons.

The curriculum provides an immersive education covering general energy topics, renewable energy resources, energy efficiency and energy conservation. In this workshop you will step into your students' shoes to complete a hands-on lesson as well as work with the curriculum to imagine how you can integrate it into your classroom.

An introduction to WPS Solar Olympics will also be provided.
